(54) TRANSPARENT CASSETTE LINER

(57)Abstract:

PURPOSE: A cassette liner, obtained by coating the surface of a PET film having the surface activated by physical or chemical treatment with a film of a specific perfluoropolyether and having excellent friction and abrasion characteristics, smoothness, optical characteristics and economic advantage at the same time.

CONSTITUTION: A transparent cassette liner obtained by coating the surface of a transparent polyethylene terephthalate film having the surface activated by physical or chemical treatment, e.g. corona discharge, plasma etching or a hot alkali, with a film of a perfluoropolyether containing elements expressed by the formula $-C_xF_{2x}-O-$ (x is an integer) as main constituent elements and having ester groups or hydroxyl groups at least one ends thereof to give 0.01W5.0 μ m film thickness.
